01 Introduction

This document is the definitive guide to the Tilz Spa by Tilda brand. It ensures consistency across every touchpoint — from social media and website to printed materials and in-spa signage.

Every vendor, designer, printer, and team member who works with the brand must follow these guidelines. Consistency is what separates a premium brand from a generic business.

02 Logo

The Tilz Spa logo is a circular rose-gold emblem featuring a twin-leaf icon above the brand name. The circular form communicates completeness, wholeness, and care. The leaf represents nature, renewal, and wellness.

Logo Variants

The brand uses three logo variants:

- Primary Mark — The full circular emblem with leaf icon, “TILZ SPA” and “by Tilda”. Used on all primary materials.
- Wordmark Only — “TILZ SPA by Tilda” in the brand typeface without the circle. Used where space is limited (email signatures, favicons at larger scale).
- Icon Only — The leaf icon alone. Used for favicons, watermarks, and social media profile pictures at small sizes.

Clear Space & Minimum Size

Clear Space Rules

- Maintain a clear zone around the logo equal to the height of the letter “T” in TILZ
- No text, images, or other elements should encroach on this space
- The clear zone ensures the logo always breathes and maintains its premium presence

Minimum Size

- Digital: Minimum 120px wide for the full circular mark
- Print: Minimum 25mm wide for the full circular mark
- Wordmark: Minimum 80px / 18mm wide
- Icon only: Minimum 32px / 8mm

Approved Backgrounds

- White or off-white (#FFFFFF, #FAF7F2, #F5F0E8) — preferred
- Light cream or ivory backgrounds
- Soft blush or rose tint backgrounds
- Dark chocolate brown (#3C2415) — use the light/cream version of the logo

Never place the logo on busy, patterned, or high-contrast backgrounds.

Logo Misuse

Never Do This

- Do not stretch, skew, or distort the logo
- Do not change the logo colours to unapproved colours
- Do not add drop shadows, outlines, or effects
- Do not rotate the logo
- Do not place the logo on clashing or busy backgrounds
- Do not recreate the logo in a different font
- Do not crop the leaf icon or any part of the mark

03 Colour Palette

The Tilz Spa palette draws from warmth, earth, and understated luxury. Cappuccino brown and dark chocolate create grounding richness, while rose gold adds the signature touch of femininity and refinement.

Primary Colours

	Cappuccino Brown #C4A882	Primary brand colour. Used for headings, accents, and key UI elements. Warm, inviting, premium.
	Dark Chocolate #3C2415	Secondary brand colour. Used for body text, backgrounds, and grounding elements. Rich and authoritative.
	Rose Gold #B76E79	Signature accent from the logo. Used sparingly for highlights, icons, and special touches. The luxury signal.

Supporting Colours

	Warm Gold #D4AF6F	Accent for premium elements — borders, dividers, call-to-action highlights. Use with restraint.
	Soft Rose #E8C4C0	Subtle background tint for feminine touches. Story highlights, special offers, seasonal content.
	Soft Cream #F5F0E8	Primary background colour. Clean, warm, breathable. Used across website, documents, and printed materials.
	Ivory White #FAF7F2	Secondary background. Slightly warmer than pure white. Cards, containers, overlay backgrounds.
	Warm Grey #9B8E82	Supporting text colour for captions, metadata, secondary information. Subtle and refined.

Colour Usage Rules

Usage Guidelines

- Cappuccino Brown is the primary — it should be the most visible brand colour across all materials
- Dark Chocolate is for text and grounding — never use it as a large background fill without cream text
- Rose Gold is precious — use it like jewellery. A little goes a long way
- Never use pure black (#000000) — always use Dark Chocolate for text
- Never use pure white (#FFFFFF) for backgrounds — use Soft Cream or Ivory
- Colour ratios: 60% cream/ivory, 25% cappuccino/chocolate, 15% rose gold/gold accents

04 Typography

Typography reinforces the brand’s minimal-luxury positioning. The pairing of a serif heading typeface with a clean sans-serif body creates contrast that feels both elegant and modern.

Primary Typefaces

Headings — Playfair Display (or Georgia)

A refined serif typeface with high contrast and elegant curves. Used for all headings, titles, and feature text. Communicates sophistication and tradition.

05 Photography & Imagery

Photography is the most powerful expression of the Tilz Spa brand. Images must communicate calm, quality, and a sensory experience that words alone cannot convey.

Photo Direction

- Clean compositions with breathing space — never cluttered
- Soft, warm natural light — golden hour tones preferred
- Close-up texture shots: linen towels, stone surfaces, water droplets, candle flames
- Hands at work: applying treatments, folding towels, preparing products
- Space photography: empty treatment rooms, arranged products, calm waiting areas
- Client photography (with permission): relaxed expressions, closed eyes, serene moments

Colour Mood in Photography

- Warm, muted tones — cappuccino, cream, soft rose, earth tones
- Avoid harsh shadows or stark white lighting
- Avoid neon, electric, or oversaturated colours
- Natural materials dominate: wood, linen, cotton, stone, ceramic

Photography Don'ts

Never Use

- Stock photos that feel generic or staged
- Images with visible clutter, mess, or unfinished spaces
- Harsh flash photography
- Cool-toned or blue-shifted colour grading
- Images of people looking directly at the camera in a forced smile
- Low-resolution or pixelated images
